**City:** Bucharest

## About me

---

Graduate in Economic Informatics, with a foundation in both technical and economic fields. I have beginner-level knowledge in web and software development, using technologies such as Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind, and shadcn/ui, as well as experience with relational and non-relational databases (SQL, MongoDB). I have also explored process automation using n8n and integrating AI into workflows to make work more productive and efficient. At the same time, I have basic knowledge in accounting, auditing, and data analysis, giving me a balanced technical and analytical perspective.

I adapt quickly to new situations, enjoy finding practical solutions, am positive yet realistic, and work well in a team. I am looking to start my career in an environment where I can learn, grow, and apply both my technical and analytical skills.

Skills:

- Web & Software Development: Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind, shadcn/ui, GitHub/Git
- Databases: MongoDB, SQL
- Automation & AI: n8n, integrating AI into workflows for productivity
- General Skills: adaptability, problem-solving, analytical thinking, team player
- Economic Skills: basic knowledge of accounting, auditing, data analysis
